CUSTOMER ORDER COMMENT

Extension for Magento 2

Order Comment

Order Comment is a great extension for Magento 2, which will add the comment field in the ordering section. Customers will be able to leave comments, instructions or special requests for that particular order and the administrator will be able to see it on the order page in the admin area.

Extension includes:
- Comment field on the checkout page;
- Output field in admin panel;
- access to comments from any point in the code via the $order->getCustomerComment ();
- module written in Magento 2 standards;
- Easy installation

Installation:
- Copy the folder with the module at the root of your site;
- run the following command:
  - php bin/magento setup:upgrade
  - php bin/magento setup:di:compile
  - php bin/magento setup:static-content:deploy
  - php bin/magento cache:clean
- after they are completed, you should see the list of modules this module.

Settings:
Click admin-> stores-> configuration-> sales->checkout->checkout options and turn on Enable Order Comment field.

Note: The extension can override the files that you already use. Make sure that there are no conflicts with your modules before using this module. The module has been tested on Magento 2.1 with Sample Data.
